

Vessel and Landside Operations Update;

The Terminal has had a good few hours clearing snow and making safe operational areas which has allowed us to remain open to both Vessel and Landside Operations throughout the night and this morning, albeit it at a reduced capacity.

Both Vessel and Landside Operations are currently under control and we have been increasing the booking availability for Landside over the past two hours. We will be adding additional bookings gradually back into the VBS system so we can get back to full capacity.

Regards

LCT
