

STEEL BOLT SEALS FOR ALL “LADEN” CONTAINERS DELIVERED TO THE TERMINAL

Dear Haulier,

Please be informed that due to new regulations and increasing security measures on several terminals all containers shipped out must have a steel bolt seal in place.

Containers equipped with other then bolt seals will be considered as NOT sealed.
Pls make sure each export container has a bolt seal upon arrival at the terminal.

In case no bolt seal in place pls make sure you add a bolt seal **before** you check-in at the terminal and advice additional sealnumber to terminal & the shipping line.

If you do not have a seal available pls contact the transport company you get your orders from or ask the terminal to provide a bolt seal.

We thank you for your cooperation.
